

OUR 2025 LINEUP

IP Phones

A device for every workstation — prepared and tested in our lab

Our service

- We improve the quality of life of employers and their employees.
- We give start-ups a professional touch.
- We make life easier for the person handling incoming calls.
- We enable employees to work remotely — and managers to validate its quality.
- We replace the good old Nortel systems that have reached end of life.

How does it work?

- VoIP = Voice over Internet Protocol: your voice travels over your Internet connection.
- You can unplug the telephone wires — phone cabling is no longer needed.
- The phone is autonomous: it works without any on-site system.
- All it needs is Internet: at the office, at home or on the road.

Lines at the best price

Canada–US lines at \$14.95/month. Get your quote online: rntcanada.com/en/voip.html

Desk phones

GXP2170 with extension module

The reception station: multiple keys and an extension module to see and reach your frequent contacts in one touch.

GXP2135 — desk agent

The versatile everyday workstation, perfect for agents and teams.

WP810 — cordless WiFi

The portable handset: move freely around your premises, no wires or cabling.

GRP2614 — WiFi

The full-featured desk phone, connected to your wireless network — no network cable required.

Good to know — WiFi devices

Basically, the process is the same for every WiFi device: connect it to your wireless network and it is ready to work. Whichever model you choose, setup happens the same way.

Conference and mobility

GAC2500 — conference phone

For your meeting rooms: omnidirectional microphone and touch screen.

Desktop and mobile app

Your extension on your computer or cell phone: calls, chat, presence — everywhere.

Video conferencing compatibility

Our solution integrates with Microsoft Teams for your calls and meetings.

CRM compatibility

Bullhorn, HubSpot, Microsoft Dynamics, Pipedrive, Salesforce, SugarCRM, SuiteCRM, Vtiger, Zendesk, Zoho and proprietary CRMs. Other CRMs may work, subject to prior validation.

To choose the right device
