

SETUP GUIDE

WiFi Setup — GRP2612 / 2614 / 2616

Connect your phone to your wireless network in 8 steps

- 1 Plug in the power using the power adapter.
- 2 Press the button at the centre of the arrows to open the menu, navigate with the arrows and choose “System”.
- 3 Press the round button again to select.
- 4 With the arrow, choose “WiFi Setting”, then select.
- 5 Confirm “WiFi Enabled”, then scroll down to “Scan”.
- 6 Choose your WiFi network from the list, then select.
- 7 Enter your WiFi password using the phone keypad (“old-school” style).
- 8 “Connecting...” — the phone returns to its main screen and the connection symbol appears on the display.

Good to know — all our WiFi devices

Basically, the process is the same for every WiFi device in our lineup (GRP2612, GRP2614, GRP2616, WP810, WP820, WP836): open the WiFi menu, choose your network, enter your password — and the phone is ready to work.
